

## ATACA MODEL

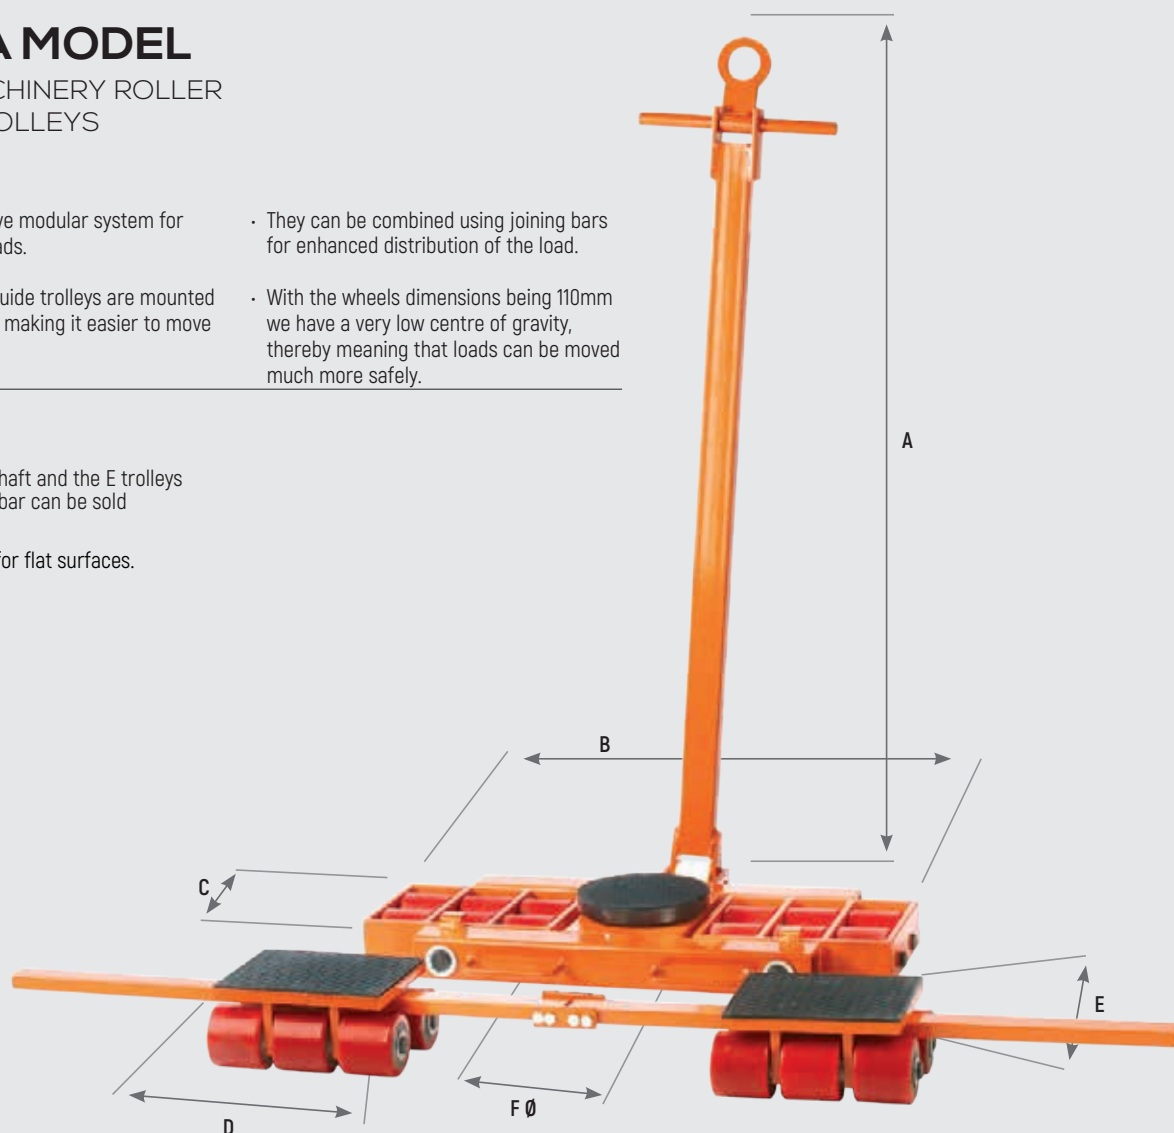

### HEAVY MACHINERY ROLLER SKATES TROLLEYS

#### Features:

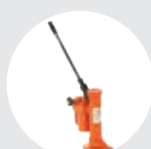

- Solid and effective modular system for moving heavy loads.
- They can be combined using joining bars for enhanced distribution of the load.
- The trucks and guide trolleys are mounted on a ball bearing making it easier to move them.
- With the wheels dimensions being 110mm we have a very low centre of gravity, thereby meaning that loads can be moved much more safely.

#### Note:

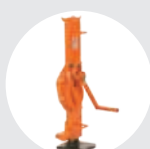

- The truck with shaft and the E trolleys with the joining bar can be sold separately.
- Recommended for flat surfaces.

MODEL	CAPACITY (Kg)	HEIGHT	A	B	C	D	E	F Ø	NET WEIGHT (Kg)
ATACA 008	8.000	110	1.010	220	210	130	130	150	25
ATACA 012	12.000	110	1.010	220	210	200	175	150	30
