

FD MODEL

DYNEEMA PROTECTIVE COVERS WITH VELCRO

These protective covers are suitable for both flat slings and round slings. Their high resistance to cutting and tearing from abrasion makes them a very safe lifting accessory. These covers considerably extend sling life.

Thanks to their Velcro, they adapt very easily to the lifting point, even with the presence of friction and sharp edges. They can also be used with temperatures from -50°C to 70°C

CODE	MODEL	PROTECTION FOR JAGUAR FLAT POLYESTER SLINGS	LENGTH (M)
FD30	FD30	1.000.-kg	0,5
FD60	FD60	2.000.-Kg	0,5
